

KISHU WORLD

TOKENIZING REAL JAPAN

“Where Membership Means Ownership”

Project Overview

Kishu World reinvents traditional membership paradigm. Starting with unique properties across Japan.—where every member helps shape the future.

Vision

Kishu World aims to build a member-owned cultural ecosystem powered by tokenized real estate, DAO governance, and creator participation. We're not just selling stays – we're building a global network where members shape, co-create, and benefit from real spaces.

How It Works

1. Claim or buy your **\$KSC** to become a member.
2. \$KSC tokens represent shared ownership of real estate.
3. Vote on renovations, themes, and events via DAO.
4. Access free stays, perks, and early drops.
5. HODL tokens and **earn** from platform growth.

What You Get

- Join from \$10K to access tokenized real estate, DAO governance, and exclusive events.
- Invest \$100K+ to unlock villa purchase rights near flagship Creator Space and co-create the future of Kishu World.

\$KSC holders enjoy upside, access, and ownership in Japan's decentralized membership network.

Why Kishu World?

- Real assets as on-chain anchors
- Fungible token model with utility and value
- Community-led DAO governance
- Cross-chain compatibility
- Legally compliant, globally executable structures

Roadmap

- Q3 2025 – Private Sale & Whitelist
- Q4 2025 – ICO & Token Launch
- Q1 2026 – Launch Creator Space & DAO Governance
- Q2 2026 – Expand to new properties in Japan
